

Year 12 Pre-Enrolment Project

A-Level Computer Science

What is a pre-enrolment project?

A pre-enrolment project is a project that you need to undertake before the start of the course you have chosen.

You will be required to hand in your completed project at your first lesson in September

Practical PHP

A key component of the course is the use of programming languages to be able to implement algorithms and solve real world problems.

One of the languages that is will enable you to do this is PHP. Therefore, for your project you are required to complete a course on PHP from the website Udemy.

Project overview / instructions

Your task
