

BTEC Forensic and Criminal Investigation Pre-enrolment Project

Your task is to research the criminal investigation into the murder of Meredith Kercher in 2007. Two people were charged with her murder but later acquitted due to serious errors in the procedures carried out by the Investigators.

Explain the importance of the procedures used to preserve, recover and record forensic evidence and how they enable a successful criminal conviction.

Criteria

- *Use your research of the Kercher murder to support for answer.*
- *Your answer should be between 400-500 words.*
- *Any websites used must be referenced correctly.*
- *Copied text from the internet will not be accepted.*
